Official Announcement of the Au-

OTHER INCIDENTS.

NEW YORK, Sept, 20.

The Herald's postscript has the following: The death bed scene of the President was peculiarly a sad and impressive one. As soon as the doctors felt there was no longer hope the members of the family assembled. Dr. Bliss stood at the head of the bed with his hand on the pulse of the patient, and consulted in low whispers with Dr. Aguew. The Private Secretary stood on the opposite side of the bed, with Mrs. Garfield at the hedside; she at times leasting on his arm. Mrs. Lula Rockwell and Miss Mollie Garfield came into the room at the time the President lost consciousness. Afterwards they went into the hall, the door of which remained open, and waited there. What conversation was had was conducted in whispers. Those about the bed occasionally went into the corners of the room and spoke to each other, the solemnity of the occasion firmly impressing fiself upon them. There was no sound heard, except the gasping for breath of the sufferer, whose changing color gave indications of the near appreach of the end. A ter he repeated, "It hurts," he passed into a state of unconsciousness, breathing heavily at times, and then given was hypodermic injections of brandy by Dr. Agnew, assisted by Dr. Boynton. Occasionally they spoke with Dr. Bliss in quiet whispers. The President suffered no pain after the time he placed his hand upon his heart. He passed away almost quietly. The line between life and death was marked by no physical exhibition nor any word. There was also intelled norm, quietly, without pain. When it became evident that he was dead, Mrs. Rockwell placed her arm around Mrs. Garfield and led her quietly from the room. She attered no word. One by one the special tree to the president suffered and led her quietly from the special or present knew death had come, quiekly, without pain. When it became evident that he was dead, Mrs. Rockwell placed her arm around Mrs. Garfield and led her quietly from the special or president suffered no pain after the time he placed her arm around Mrs. Garfield an

DR. BOINTON'S STATEMENT.

Dr. Boynton says the end of the President was peaceful. "I noticed," he said, "the pulse was very feeble, and feeling that the end was approaching I had gone to the telegraph office to send away a telegram, when the messenger summoned me. We noticed at a glance that the Pres dent was dying and all prepared to await it and all were gathered about the bed. Colonel Rockwell stood back of the head of the bed. On the President's left in the order named were General Swaim, Mrs. Garfield and C. O. Rockwell; on his right were Dr. Boynton, Dr. Agnew and Dr. Bliss; Private Secretary Brown stood a short distance from the foot of the bed and to the right. Dan, the colored body-servant, occupied the same relative position on the other side. Mrs. Gatfield stood beside the bed, leaning over the President, with her hand resting DR. BOYNTON'S STATEMENT. side. Mrs. Gardeld stood beside the bed, leaning over the President, with her hand resting on his breast. She was visibly affects but said nothing. I put my car to his heart now and then and listened for the sounds of the heart beats, but could hear nothing. Dr. Agnew felt of the pulse occasionally. Beyond some whispering now and then among the surgeons, nothing was said. Mrs. Rockwell was in and out of the room two or three times, and the girls, Miss. Lulu and Miss. Mollie, sat out in the hall. The President was rapidly sinking, when suddenly he threw up his hands and said. "Oh, Swaim!" Then putting his hand in the region of the heart, he exclaimed, "I feel such a terrible pain here." He said this to Swaim, recognizing him as the nurse in attendance upon him at the time. He then passed off into an unconscious state which lasted twenty or twenty-five minutes, during which he gasped occasionally for breath. His eyes were partly closed. Not a muscle mysel and gradually the half an hour and sate by the remains till two o'clock, saying scarcely a word all the time, f an until I admonished her that she had better get some sleer, when she retired for the night. All the surgeons recognized at a glance that he was going. Dr Bliss administered a hypodermic injection of stimulauts when the attack first came on, but it had no effect. The President's last moments were as peaceful as could be. He died apparently without any pain, at least there were no marks of suffering upon his face.

GENERAL SWAIM'S AFFECTING STORY.

GENERAL SWAIM'S AFFECTING STORY.

Judge Advocate General Swaim, who has been with President Garfield continually since he was shot, and who was the only one with the President when he commenced sinking last night, makes the following statement:

It was my night to watch with the President. I had been with him a good deal of the time from three o'clock in the afternoon. A few minutes before ten o'clock I left Colonel Rockwell, with whom I had been talking for some moments in the lower hall, and proceeded up stairs to the President's room. On entering it I found Mrs. Garfield sitting by his bed-side. There were no other persons in the room. I said to her:

"How is everything going!"

She replied, "He is sleeping nicely."

I then said, "I think you had better go to bed and rest." I asked her what had been prescribed for him to take during the night. She replied that she did not know; that she had given him milk punch at eight o'clock. I then said, "If you will wait a moment I will go into the doctor's room and see what is to be given during the night."

She then said, "There is beef tea down stairs; Daniel knows where to get it."

I then went into the doctor's room. I found Dr. Bliss there and asked him what was to be given during the night. He answered, "I think I had better fix up a list, and will bring it in to you very soon."

I then went back into the President's room; had some little conversation with Mrs. Garfield. She felt of the President's hand and

it in to you very soon."

I then went back into the President's room; had some little conversation with Mrs. Garfield. She felt of the President's hand and lad her finger on his forehead and said, "He seems to be in good condition," and passed out of the room. I immediately felt of his hands, feet and knees. I thought that his knees seemed a little cool and got a flannel cloth, heated it at the fire and laid it over his limbs. I also heated another cloth and laid it over his right hand, and then sat down in a chair beside his bed. I was hardly seated hen Dr. Boynton came in and felt the President's pulse. I asked him how it seemed to him.

The President then said: "O. Swaim, this terrible pair: press your hand on it."

I laid my hand on his chest. He then threw both hands up to the side, and about on a liee with his head, and exclaimed: "O. Swaim, can't you stop this?" and again, "O. Swaim, it is a staring expression. I asked him fi he was suffering much pain. Reciving no answer, I repeaced the question with a like result. I then concluded that he was suffering much pain. I then concluded that he was either dying or was having a severe spasm, and called to Daniel, who was at the door, to tell Dr. Bilss and Mrs. Garfield to come in immediately, and glanced at a small clock hanging ing on the chandelier nearly over the foot of the bed, and saw it was ten minutes past ten of the Constitution. The President then said: "O. Swaim, this terrible pain; press your hand on it."

I laid my hand on his cheat. He then threw both hands up to the side, and about on a line with his head, and exclaimed: "O. Swaim, can't you stop this?" and again, "O. Swaim, it hen saw him looking at me with a staring expression. I asked him if he was suffering much pain. Receiving no answer, I repeated the question with a like result. I then concluded that he was either dying or was having a severe spasm, and called to Baniel, who was at the door, to tell Dr. Bliss and Mrs. Garfield to come in immediately, and glanced at a small clock hanging on the chandelier nearly over the foot of the bed, and saw it was ten minutes past ten o'clock. Dr. Bliss came in within two or three minutes. I told Daniel to bring the light, a lighted candle which habitually sat behind a screen near the door. When the light shone full in his face I saw that he was dying. Dr. Bliss came in a moment after. I said, "Doctor, have you any stimulants! He seems to be dying." He took hold of his wrist, as if feeling for his pulse, and said: "Yes, he is dying." I then sid to Daniel: "Run and arouse the house." At that moment Colonel Rockwell came in, when Dr. Bliss said: "Let us rub his limbs," which he did. In a very lew mome ts Mrs. Garfield came in and said: "What does this mean!" and a moment afterwards exclaimed: "O, why am I made to suffer this cruel wrong!" At 10:35 p. m. the sacrifice was completed. He breathed his last calmly and peacefully."

had passed through the spinal column in front of the spinal canal, fracturing the body of the first lumber vertebra, driving a number of small fragments of bone into the adjacent soft parts, and lodging just below the pancreas, about two inches and a half to the left of the spine and behind the peritoneum, where it had become completely encysted. The immediate cause of death was secondary hemorrhage from one of the mesenic ic arteries adjoining the track of the balt, the blood rupturing the peritoneum and nearly a pint escaping into the abdominal cavity. This hemorrhage is belived to have been the cause of the severe pain in the lower part of the chest complained of just before death. An abscess cavity, six inches by four in dimensions, was found in the vicinity of the gall biadder, between the liver and the transverse colou, which were strangely interadherent. It did not invoice the substance of the liver and no communication was found between it and the wound. A long suppurating chamel extended from the external wound between the loin muscles and the right kidney, almost to the right groin. This chamel, now known to be due to the furrowing of pus from the wound, was supposed during life to have been the track of the ball. On examination of the organs of the chest evidences of severe bronchitis were found on both sides, with bronche-pneumonia of the lower portion of the right lung, and free from abscesses, nor were any found in any other region except the left kidney, which contained near its surface a small abscess about one-third of an inch in diameter. In reviewing the history of the case in connection with the autopsy, it is quite evident the different suppurating surfaces, and especially the fractured, spongy tissue of the vertebra, furnish a sufficient explanation of the septee condition which existed.

that remained of James A. Garfield lay there, to recall the features so familiar during life. The face, to those who know General Garfield only from his portraits, could not have been recognized. Even the features were no longer there. There was an expression about the lower lip, which those who knew him best, would recognize. The cheeks were gone. The brow had lost the massive appearance which characterized it in life. The involuntary wideapread remark of all as they gazed upon the loved form with a shudder, was "I never should have recognized him. How he most have suffered." The shrunken, earthly form told how much. It was marvelons that he lived so long.

The autopsy of the President's body commenced about five o'clock and was not concluded until nearly eight. A large crowd of persons assembled at Elberon to hear the result. Dr. Bliss stated that the autopsy had been a very tedous one, and that the time occupied in searching for the ball was nearly three-quarters of an hour. The doctor said Mrs. Garfield was feeling much relieved since the autopsy, inasmuch as it resulted in establishing the fact that the patient's death was linevitable. The doctor stated further that the point of the ball was somewhat blunt, or in a battered condit on, caused by the force with which it struck the rib, while in other respects it is original shape was not altered. Dr. Bliss took charge of the bullet and sealed it for preservation until the Courts should require its production.

City at 12:10, and would be at Elberon station in an hour. The train arrived at Elberon at 1:10.

Attorney General MacVeagh was the first to enter the ear, and he was followed by the other members of the Catinet, who had accompanied him to the depot. The gentlemen remained inside only long enough to grasp the new President by the hand. Mr. Blaine was the first to alight. He was closely followed by General Arthur, to whom he offered his arm at the car steps and they walked across the platform and down the steps to the waiting carriage. The bystanders lifted their hats, and the President and Mr. Blaine returned the salutation. General Arthur's usually florid face was white, and his eyes were bent on the ground. He seemed painfully agitated.

General Arthur was watched by every person about the hotel. He glanced once or twice at the people, but they made no salutation. If entered the cottace. Mrs. Garfield had prepared for his coming. She carried herself well. The President tendered his sympathies in a feeling manner. General Grant, who was sitting in the hotel when the President went to the cottage, almost immediately followed him. The call was of ten minutes' duration. At the end of that time the three gentiemen left the côttage and General Grant returned to the hotel. In a few moments General Arthur and his son, and General Grant and his son, seated themselves in a carriage and were driven to the station, from which they took the special train back to New York.

The President will return in the morning in time to take the funeral train for Washington. Secretary B aine, accompanied by Mr. MacVeagh, called upon Mrs. Garfield later.

As the crowd slowly entered and left the hall, the bell of the little chapel in the distance was tolled. Its tones could be only faintly heard above the roar of the sea.

Immediately after the conclusion of the services, Mrs. Garfield, accompanie I by her son Harry, Colonel Swaim, Colonel and Mrs. Rockwell, Miss Mollie Garfield and Miss Rockwell, Miss Mollie Garfield and Miss Rockwell and Dr. Boynton left the cottage and boarded the first coach. The members of the tabluct and their wives followed and took seats in the second coach. Mrs. Garfield was heavily velled, and in passing to the train exhibited the same fortitude which has characterized her manner throughout. In addition to the immediate members of the family, the following composed the party on the train: Dr. Reyburn, Private Secretary J. Stanley Brown, Exacutive Clerk Warren S. Young, John R. Van Warmer, Chief Clerk of the Postoffice Department: John Jamison, rall-way mail service postoffice department: Ridge by Hunt, son of the Fostmaster General; Mr. Jay Stone, private secretary to Secretary Lincoln; ex-Sheriff Daggett, Brooklyn; Colonel H. C. Corbin and Messrs. Atchkison, Richard and other attendants upon the late President and Mrs. Garfield during her sojourn here. Just before the train was ready to start the following New Jersey State officials, accompanied by members of the Legislature, strived and acted as a guard of honor; Governor George C Ludlow, Major G. Mott, Adjutant General William Stoyker, Quartermaster General Lewis Perrine, General Willoughby Weston, General Bird W. Steneer, Colonel S. Perrine, Jr., Secretary of State James D. Hall, Comptroller E. J. Anderson, Treasurer George M. Wright, and Private Secretary to the Governor James D. Near. A few minutes before ten o'clock the casket was removed from the cottage moving from the grounds very slowly. The train reached Elberon Stat ers of Executive as cl arly as those of either of the other departments of Government and he must answer for the just use of distriction in permits and performance of the duties it im-poses. THE Mohr & Mohr distillery at Lafayette, Ind., with contents, was completely destroyed by fire on the 25th. Two hundred head of cattle were burned out of four hundred in the distillery pens. A FIRE at Ottawa, Ill., on the 24th, destroyed the City Hall and a number

of business houses and residences. An area of six blocks was burned over, causing a loss of \$150,000 or more. OVER half of the business places in the village of Lawrence, Mich., were burned

on the 25th. A PRIGHTFUL accident occurred on the Valley Railroad, twelve miles south of Cleveland, Ohio, on the night of the 25th. Cleveland, Ohio, on the night of the 25th. Just as the engine drawing a heavy special train from Canton and Massillon containing 350 passengers had arrived at the point indicated, the engineer discovered a large tree lying across the track at a curve, but he was so close upon it that it was impossibe to check up. He reversed his engine and prepared for the blow without being able to save nimself or those under his charge. In striking the tree the engine turned a complete somersault and landed a total wreck in which the engineer became imbedied and was badly injured. Mr. Burnett, proprietor of a hotel at Canton, who happened to be riding in the cab with the engineer, was also injured. A newboy in the forward car was terribly scalded. Although badly joited the cars of the train were not broken, and while many of the passengers were more or less injured none were seriously so. The engineer and newsboy were scalded and bruised so badly that it may prove [ata].

NAVY DEPARTMENT,

LONG BRANCH, N. J., Sept. 20.

To Admiral Nichols, Ebbitt House, Washington:
The officers and men of the navy and of the marine corps of the United 8 ares are hereby notified that President Garsield died at this place on the 19th inst., at ten o'clock and forty minutes p. m. Under the Constitution and laws of the Government, Chester A. Arthur, then Vice President, duly took oath as President of the United States, and has entered upon the duties of that office as President and Commander-in-Chief of the Navy of the United States. He will be obeyed and respected by all persons cannected with this department. It is becoming that at this time, when the heart of the Nation is heavy with grief, a proper expression should be given to the respect and affections of sincerity universally entertained for the memory of the wise, patriotic, and noble Chief. Magistrate who has departed this life under circumstances so distressing. To this end the officers of the navy will see to it that all honors and ceremonies belitting the occasion are observed by their respective commands in accordance with the regulations of the service. The office of the department will remain closed for all business during the term that the remains of the President shall lie in State at the Capitol. [Signed]

WILLIAM H. HUNT,

Secretary of the Navy. Long Branch, Sept. 20.

Hamila and a few others. This step was tak-en after the conference between the President, Secretary Blaine and the Attorney General. Very few persons knew that the oath was to be administered until the ceremony was over. The President and the members of the Cablact had assembled in the marble room shortly before twelve o'clock. Land Justice Walte, in his full robes of office, accompanied by Assohis full robes of office, accompanied by Asso-ciate Justices, proceeded from the Supreme Court room to the room. The doors were im-mediately closed, and without any formality President Arthur arose, and standing on one side of the center-table, with Chief Justice Waite on the other, took the oath of office. The President's manner was calm and com-posed and his response, "So help me God," was in a firm tone and without a tremor. The President then read from manuscript notes

the following address:
For the fourth time in the history of the Republic its Chief Magistrate has been recoved by death. All hearts are filled with grief and by ocati. An incarts are most which has dark-ened our land and the memory of the mur-dered President, his protracted sufferings, his unyielding fortifude, the example and achieve-ments of his life and pathos of his death will ments of his life and pathos of his death will forever adorn the pages of our history. For the fourth time the officer elected by the poople and ordained by the Constitution to fill a vacancy so created is called to assume the Executive chair. The wisdom of our fathers foreseeing even the most dire possibilities made sure that the Government should never be imperilled because of the uncertainty of human life. Men may die, but the fabries of four free institutions remain unshaken. No higher or more assuring proof could exist of the strength and permanency of a popular government than the fact that though the chosen of the people be struck down his constitutional successor is peacefully installed-without shock or strain, except the sor-row which mourns the bereavement. All the noble aspirations of my lamented the noble aspirations of my lamented predecessor, which found their expression in his life, the measures devised and suggested during his brier administration to correct the abuse and enforce economy, to advance prosperity and promote the general welfare and to ensure domestic security and maintain friendly and honorable relations with the Nations of the earth, will be garnered in the hearts of the people, and it will be my carnest endanyor to profit and to see that the Nation shall profit by his example and experience. Prosperity by his example and experience. Prosperity blesses our country. Our fiscal policy is fixed by law as well grounded and generally ap-proved. No threatening issue mars our for-eign intercourse, and the wisdom, integrity and thrift of our people may be trusted to continue undisturbed for the present, with as-sured career of peace, tranquility and welfare. The groom and anxiety which have enshrouded the country must make repose especially welcome now. No demand for speedy legisla-tion has been heard; no adequate occasion so apparent for an unusual session of Congress. The Constitution defines functions and pow-
